Phone: +7 (708) 501-21-61

To Whom It May Concern,

It is with great pleasure that I write this letter to highly recommend Egor Kramarenko for a legal position within your organization. As the CEO and Founder of TOO "DIGITALTOWN", an innovative IT startup specializing in software development, cryptography, and blockchain technologies, I have had the privilege of working closely with Egor over the past two years. He has been our trusted legal counsel since the very inception of our company.

Egor's contribution to our initial launch in March 2024 was invaluable. He expertly navigated the complexities of corporate formation, establishing a robust legal framework and drafting all foundational corporate governance documents. His proactive approach ensured our early-stage compliance and allowed the technical team to focus entirely on product development.

Furthermore, Egor demonstrated exceptional acumen in corporate transactions by independently sourcing a buyer and structuring the sale of a corporate stake in our company. During this M&A process, he successfully managed the legal due diligence, drafted the term sheets and Share Purchase Agreements (SPA), and led the negotiations, showcasing a high level of commercial awareness and risk mitigation skills.

Currently, Egor is leading the legal structuring for an upcoming venture capital investment round in our flagship blockchain cryptography project, Signaturum. In this capacity, he is not only preparing complex investment agreements (such as SAFEs and convertible loan notes) but is also providing critical advisory on European Union law. His deep understanding of EU regulatory frameworks, including data protection (GDPR) and emerging digital asset regulations (such as MiCA), has been instrumental in ensuring our architecture is fully compliant for the European market.

Beyond his specific achievements, Egor possesses a versatile legal mindset. He is highly skilled in cross-border contract drafting, intellectual property protection, and regulatory compliance. He thrives in the fast-paced, ambiguous environment of the tech sector, consistently delivering pragmatic, business-oriented legal solutions rather than merely pointing out legal roadblocks.

Sincerely,

Konstantin Khoryshev

CEO, TOO "DIGITALTOWN"
